

**AIRSTREAM®**

# QUALITY *Guide*

When you choose an Airstream touring coach you aren't choosing a vehicle where best-in-class requires an upgrade. It comes standard.

# Confidence in Every *Detail*

**When you choose an Airstream touring coach, you're not just buying an RV – you're investing in over 90 years of unparalleled expertise in recreational vehicle craftsmanship.**

With more than 50 years of expertise in building motorized recreational vehicles, our design, engineering, and manufacturing teams are on a constant quest to push beyond the boundaries of style, luxury, and innovation. Whether it's a sleek, feature-filled Class B touring coach, an adventure van that lets you explore beyond the pavement, or a European-inspired travel van that lets you bring the whole family along for the ride, Airstream touring coaches are ready to make your travel dreams come true.

Discover more about the power, performance, safety, and capabilities at the heart of Airstream's motorized lineup with our in-depth Airstream Touring Coach Quality Guide.

## **A Legacy of Excellence**

Founded in 1931, Airstream has spent almost a century honing our craft and improving our products. That legacy speaks for itself, with iconic products that are instantly recognizable as symbols of exploration, adventure, and travel freedom.

# Safety Comes *Standard*

**With an Airstream touring coach, every available safety feature offered by Mercedes-Benz or RAM is included as standard.**

Other RV manufacturers offer safety features as upgrades. But Airstream touring coaches are designed to provide peace of mind and enhance the overall safety of your journey, ensuring you can focus on enjoying the road ahead. For Airstream, safety comes standard – not as an optional upgrade.

From blind spot monitoring and adaptive features that automatically adjust with road conditions, and camera monitors that give you increased situational awareness, Airstream touring coach safety features provide excellent protection whether navigating a parking lot or an interstate highway. Relax in the rhythm of the road and enjoy the journey as much as the destination, with safety features that have your back every time you leave the driveway.

# Standard Safety Features in Airstream Touring Coaches

- Heavy Duty Anti Lock Braking System
- ParkView® Rear Back-Up Camera
- Rain Sensing Wipers
- Traffic Sign Information
- Trailer Sway Control

# Performance and Power Under the *Hood*

**We believe in doing things the right way, which is why we only collaborate with certified partners.**

Every Airstream touring coach is powered by a capable and dependable engine that will provide years of diligent service as you pursue your travel dreams. In addition to selecting all the available features we can fit into each coach, we also introduce additional features like Air Ride suspension and secondary alternators to help charge cabin battery systems. The addition of these extra features aren't taken lightly – you can trust that each enhancement is rigorously tested and approved by the chassis manufacturer. This ensures not only optimal performance but also peace of mind for Airstream touring coach owners.

**Powerful Engines:** Ample horsepower and torque ensure smooth acceleration and effortless cruising on highways and mountain roads.

**Smooth Ride:** Enjoy a comfortable, pleasant ride quality, thanks to advanced suspension systems and engineering that absorb road imperfections and vibrations.

**Responsive Handling:** With precise steering and responsive handling characteristics, Airstream touring coaches offer exceptional maneuverability, allowing drivers to navigate tight turns and parking lots with ease.

**Fuel Efficiency:** Energy-efficient engines reduce operating costs and environmental impact without sacrificing performance.

**Towing Capacity:** Airstream touring coaches come with impressive towing capacities, allowing you to bring along smaller trailers, boats, or other recreational vehicles for extended adventures.

## Design and *Luxury*

**No matter where the road takes you, luxury is always within reach.**

Whether you're embarking on a cross-country adventure or simply escaping for the weekend, Airstream touring coaches ensure you travel in unparalleled comfort. Thoughtful amenities abound, from state-of-the-art entertainment systems to gourmet kitchens equipped with top-of-the-line appliances. Each floor plan is meticulously crafted to cater to the most discerning travelers.

- High-quality, lite-ply and hardwood cabinets are hand-built by our craftsmen. You won't find particle board in our residential-style cabinetry.
- A multi-layer, insulated floor and wheel wells provide greater heating and cooling efficiency, as well as dampening road noise while en route.
- Relax and kick back on seating upholstered in luxurious, durable, and easy-to-clean fabrics like Ultra-leather and Nassimi Vinyl.
- Marine-grade, vinyl flooring is soft under foot, resistant to dirt and debris, and cleans up quickly.
- Signature aluminum accents throughout deliver that iconic Airstream look on the ceiling, cabinet framing, and trim.

# Manufactured with Care and Attention to Detail *in Ohio*

Since 1980, all Airstream recreational vehicles have been manufactured in Jackson Center, Ohio. Our sprawling campus features a 275,000-square-foot dedicated touring coach manufacturing plant – the world’s largest dedicated Class B/B+ RV production facility.

Inside, we outfit every chassis with additional upgraded features, while nearby our craftspeople hand-build furniture, cabinetry, beds, and more in our in-house woodshop. Driver and passenger seats are removed and reupholstered, while the interior is outfitted with the very best appliances available on the market. We leak test every unit in our on-site water test bays, where 88 high-pressure spray nozzles douse each unit with 350 gallons of water a minute while we check the interior for leaks. Only once the unit has passed its leak test is it approved to move on for final buildout.

## Only Make Improvements

Airstream founder Wally Byam demanded that his company only make improvements, and never make changes simply for the sake of change. More than ninety years later we’re still living up to that design philosophy, with improvements that upgrade the travel experience beyond the norm. Likewise, our associates work hard to improve their skills and the production process, with suggestions for how to adjust for better efficiency and quality. And when it comes to quality, our system employs numerous checks throughout the production line before a comprehensive check of every system, appliance, light switch, plumbing and gas line, and more before the unit is cleared for delivery to waiting customers across the country.

# Care For the *Environment*

**Working together to preserve and protect the outdoor world we all love to enjoy.**

Every Airstream is manufactured with durable materials that last for generations. The vast majority of materials left over from production are recycled, and Airstream is constantly working to better understand how we can further reduce non-recyclable output during manufacturing. In addition, we've set our sights on a zero-waste-to-landfill goal and are continuing efforts to strengthen this already robust program that reduces waste across the business.

Airstream's manufacturing facilities are powered by renewable energy through a unique partnership with the local community. Jackson Center Municipal Power's EcoSmart Choice program allows Airstream to purchase renewable energy from wind, hydroelectric, or landfill gas projects offered through American Municipal Power, Inc.

## **Certified Emerald Green**

Our streamlined production process minimizes waste and utilized low-emission materials. That's why every Airstream touring coach – as well as our manufacturing process – is certified Emerald Green Off Grid by the TRA Certification of Elkhart, Indiana. That's the highest level of certification, and it's based on a third-party evaluation of resources, energy and water efficiency, indoor environmental quality, and operation and maintenance of production facilities.
